Our Mission

Enhance community health by offering dental care for all.

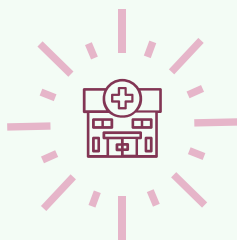

We're making a huge impact on Michigan's oral health!

Nearly 20 years ago, MCDC was founded on the principle of partnership with local health departments. Today, MCDC is partnered with 20 out of 45 local health departments working collectively to improve oral health and health outcomes.

MCDC operating on behalf of local health departments is eligible for an enhanced reimbursement rate for adults enrolled in the traditional FFS Medicaid

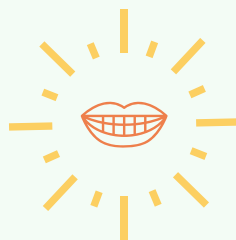

program referred to as the Dental Adjustment Payment Program(DAPP).

With the support of the health departments and partners throughout Michigan, we are working together as a diverse network of advocates to enhance community health by offering access to quality dental care for all.
